# HYDROPHOBIC FILTER

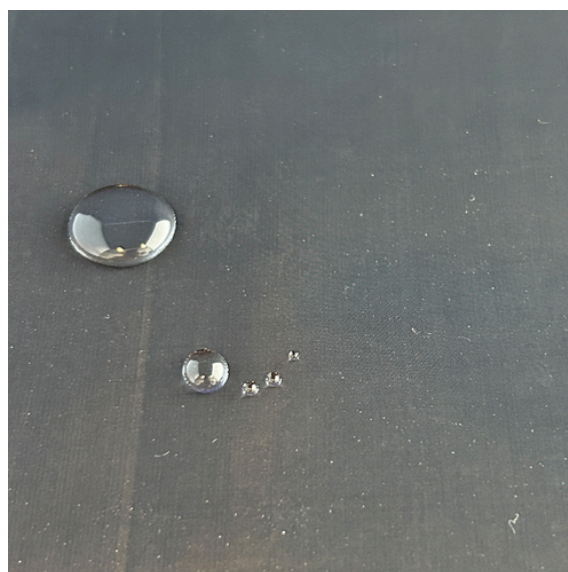

**APPLICATIONS:**

Hydrophobic mesh filters are used in many electronic enclosures sensitive to water.

The filter alone or in combination with a foam prefilter achieves in many applications the desirable IP rating of the enclosure.

A Prefilter prevents front loading of dust, this foam arrests the bigger particles avoiding a dust blanket.

The filter combined with our other filter components, frames and supporting grid gives a ruggedized solution for your water sensitive applications

**INDUSTRIES**

- Digital Signage
- Industrial Machinery
- EV charging equipment
- Electronics in humid environment

**FILTER MEDIA**

PET

Finish Stabilized black, super hydrophobic

**Air permeability**

@ 200 Pa EN ISO 9237 8280 m<sup>3</sup>/(m<sup>2</sup> . h)

**OPERATING TEMPERATURE**

80 °C
